1. Introduction

1.1. Purpose

The purpose of this document is to provide a quick status on the <Project name> product development progress.

1.2. Scope

The document represents a high-level status for the week: current team progress, dependencies and issues and plans for the next week.

2. Project overview

Development:

Development team is working on the 6<sup>th</sup> sprint tasks and performs bug-fixing.

Testing:

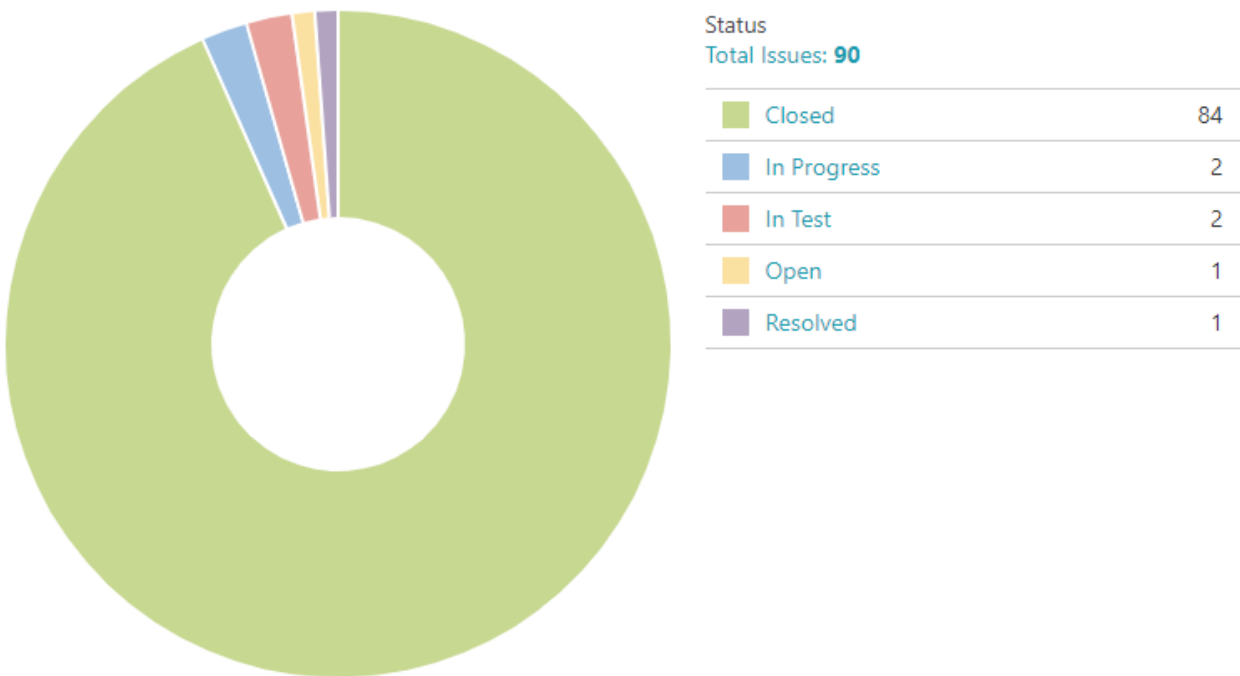

Testing team is working on 6<sup>th</sup> sprint tasks testing, performs bug-retest and regression testing.

3. Technical Progress

3.1. Development progress

3.1.1. 6<sup>th</sup> sprint tasks

6<sup>th</sup> sprint tasks are in progress now. Below is a chart representing the 6<sup>th</sup> sprint tasks by status:

3 % of tasks are on development side.

5 % of tasks are on testing side.

90 % of tasks are completed.

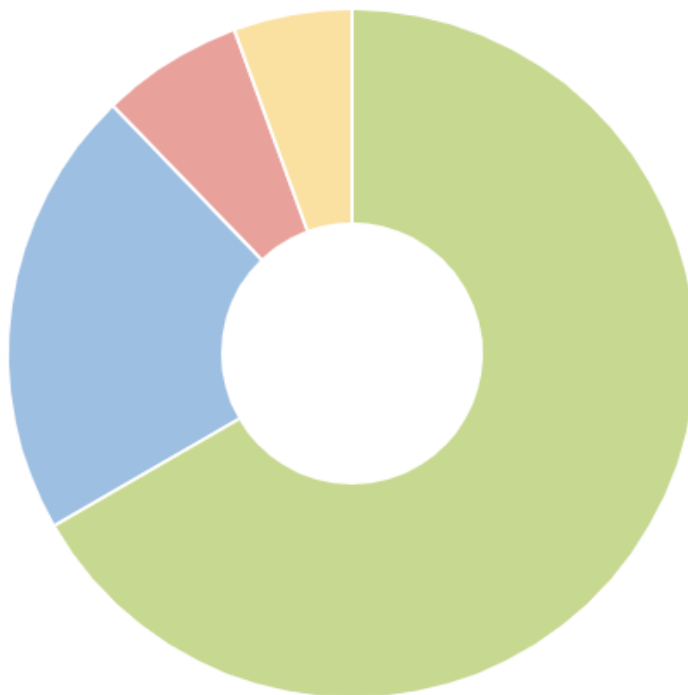

Summary	Status
<property name> property for form field should enlarge the field height on UI	Open

Rename form templates if the issue with TC long file paths is resolved	In Progress
Update installation guide	In Progress
Fix performance issue that object creation becomes significantly slower after thousands of attempts	Resolved
Rename <product name1> to <product name2>	In Test
Limit number of parallel connections	In Test
Rename "<permission1>" permission to "<permission2>"	Closed
"<Button name>" button should ban the token instead of killing it	Closed
...	

### 3.2. Testing progress

#### 3.2.1. Testing coverage

Test cases creation for 6<sup>th</sup> sprint tasks is almost done:

Testing Phase  
Total Issues: 90

Tests not needed	60
NotReviewedTests	19
ReviewedTests	6
None	5

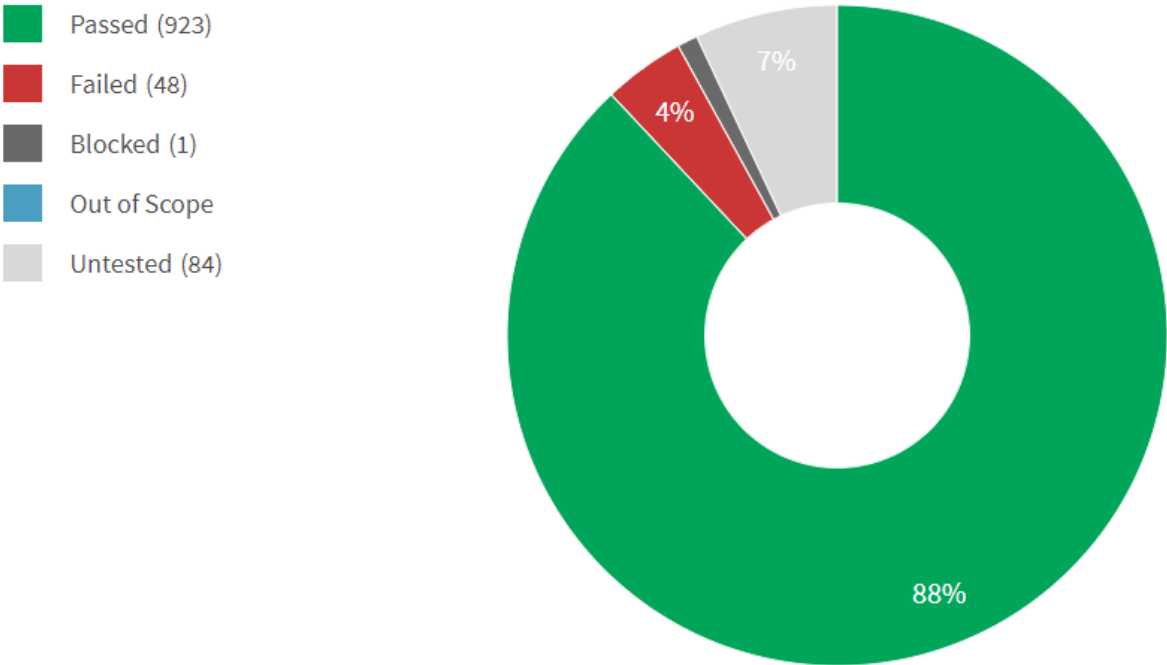

Summary	Testing Phase
If object form field contains "ForceUpdate: true" then field value should be overridden with value from server	Tests not needed
Make sure all datetime inputs work properly if server returns DateTime values without specified timezone	Tests not needed
Add [DateModified] field to object form response for entities	Tests not needed
See new shortcuts in the list of shortcuts	Tests not needed
Favorite filters panel: Remove object types from filters names	Tests not needed
"<window name>" window title should contain object universal name; if it's unavailable then display "<text 1>" instead of "<text 2>"	Tests not needed
...	

3.2.2. Test statistics

Testing team is in progress of testing 6<sup>th</sup> sprint tasks now:

● Test Execution Status

Test execution status breakdown by status

	1/14	1/21	1/28	2/4	2/11	2/18	2/25	3/03	3/10	3/17
Total number of tests	232	419	440	533	557	709	899	960	1056	
Untested	87	152	52	83	24	155	229	130	84	
Passed	117	234	345	404	485	506	617	767	923	
Failed	17	32	41	44	46	46	51	61	48	
Blocked	10	1	2	2	2	2	2	2	1	
Out of scope	1	0	0	0	0	0	0	0	0	

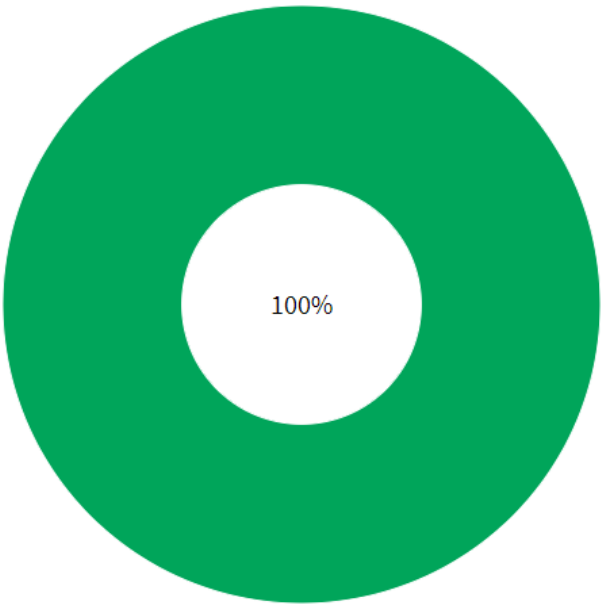

3.2.2.1. New "<setting name>" setting

Feature testing is done. Here are testing results:

● Test Execution Status

Test execution status breakdown by status

- Passed (22)
- Failed
- Blocked
- Out of Scope
- Untested

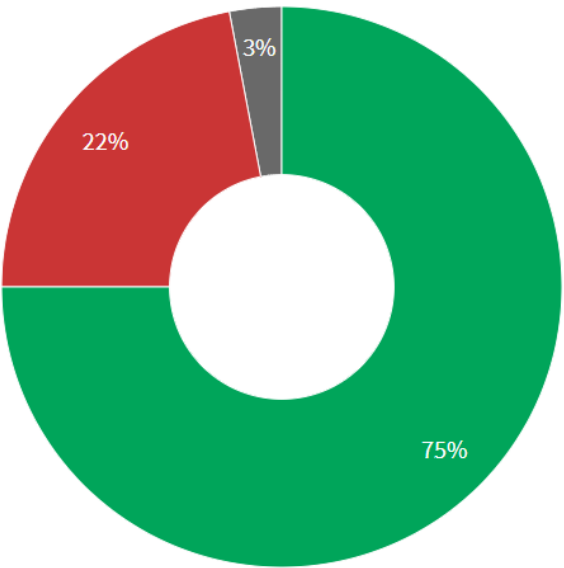

3.2.2.2. See <field1 name> field dependent on <field2 name> field

Feature testing is completed. Here are testing results:

● Test Execution Status

Test execution status breakdown by status

- Passed (20)
- Failed (6)
- Blocked (1)
- Out of Scope
- Untested

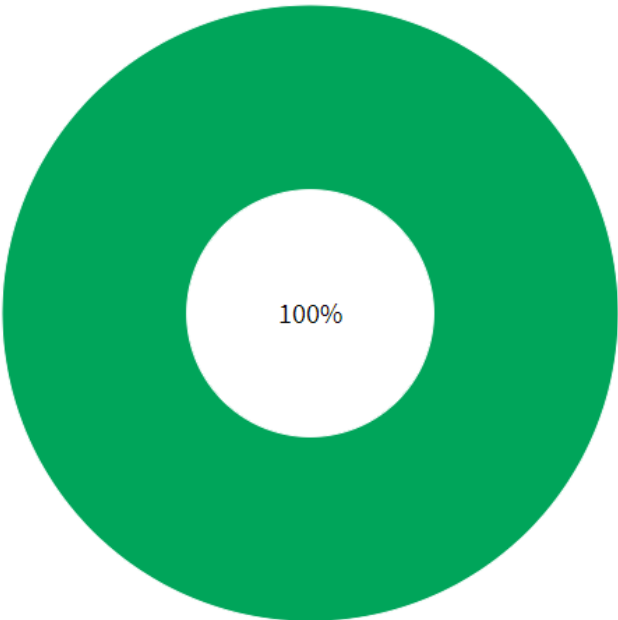

3.2.2.3. See 'multicode' fields in forms

Feature testing is completed. Here are testing results:

● Test Execution Status

Test execution status breakdown by status

- Passed (21)
- Failed
- Blocked
- Out of Scope
- Untested

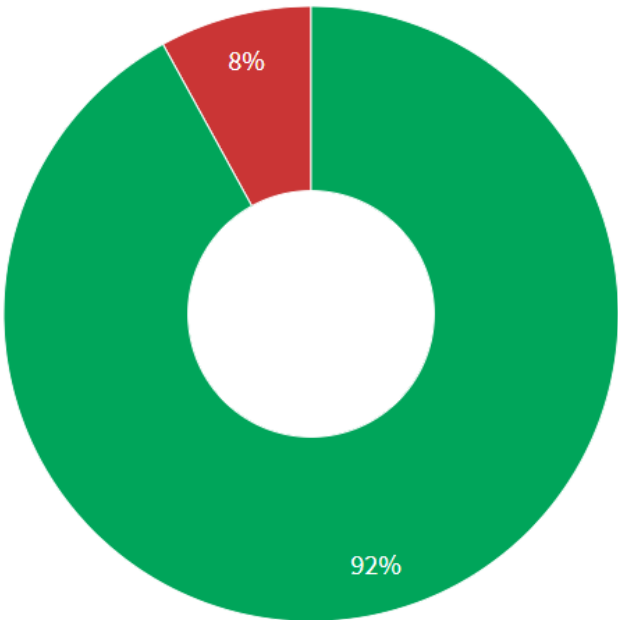

3.2.2.4. See connected objects list

Feature testing is completed. Here are testing results:

● Test Execution Status

Test execution status breakdown by status

- Passed (65)
- Failed (6)
- Blocked
- Out of Scope
- Untested

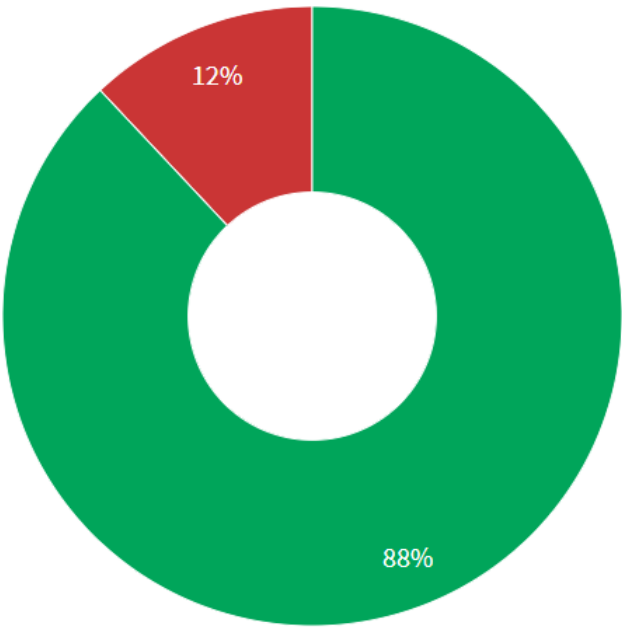

3.2.2.5. Set location component

Feature testing is completed. Here are testing results:

● Test Execution Status

Test execution status breakdown by status

- Passed (134)
- Failed (19)
- Blocked
- Out of Scope
- Untested

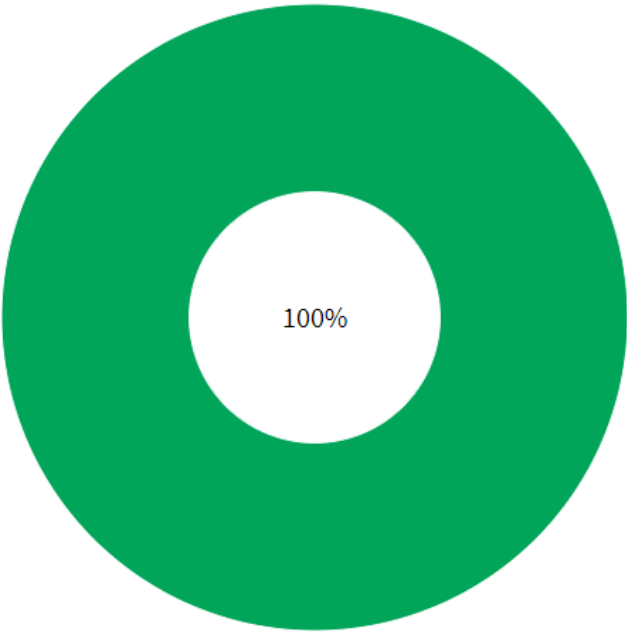

3.2.2.6. Permissions

Feature testing is completed. Here are testing results:

● Test Execution Status

Test execution status breakdown by status

- Passed (17)
- Failed
- Blocked
- Out of Scope
- Untested

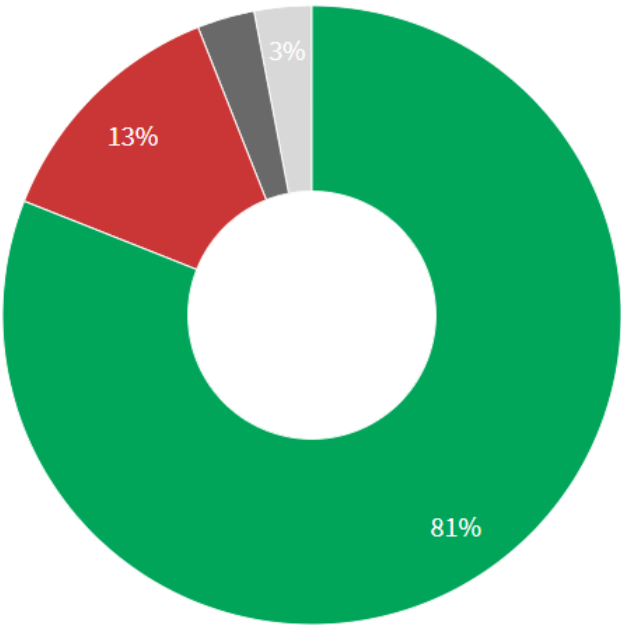

3.2.2.7. Multiple instances

Feature testing is in progress. Here are testing results by now:

● Test Execution Status

Test execution status breakdown by status

- Passed (24)
- Failed (4)
- Blocked (1)
- Out of Scope
- Untested (1)

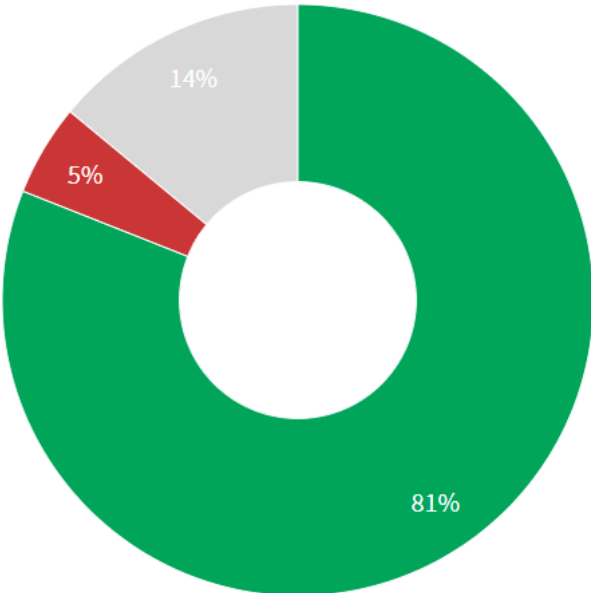

3.2.2.8. Custom objects support

Feature testing is almost done, only minor checks are left. Here are testing results by now:

● Test Execution Status

Test execution status breakdown by status

- Passed (123)
- Failed (8)
- Blocked
- Out of Scope
- Untested (23)

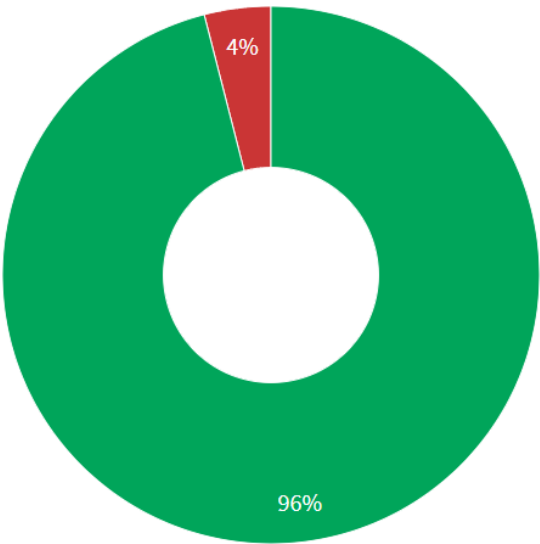

3.2.2.9. Licensing

Feature testing is completed. Here are results:

● Test Execution Status

Test execution status breakdown by status

- Passed (124)
- Failed (6)
- Blocked
- Out of Scope
- Untested

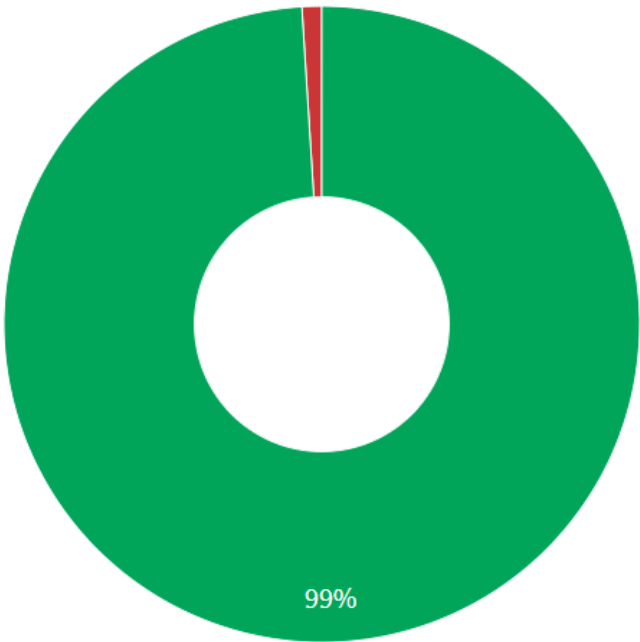

3.2.2.10. Renaming of products

Feature testing is completed. Here are results:

● Test Execution Status

Test execution status breakdown by status

- Passed (80)
- Failed (1)
- Blocked
- Out of Scope
- Untested

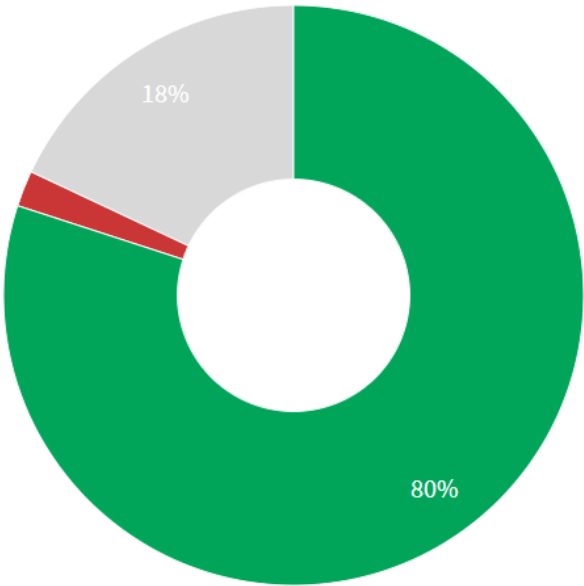

1.1.1.1. Regression testing

Regression testing is in progress. Here are results by now:

● Test Execution Status

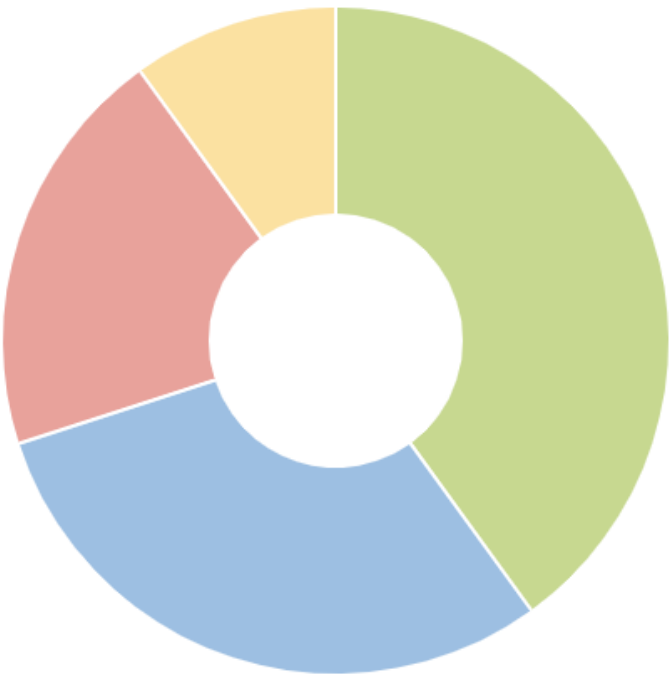

Test execution status breakdown by status

- Passed (260)
- Failed (7)
- Blocked
- Out of Scope
- Untested (60)

3.2.3 Bugs statistics

1.1.1.1. 6th sprint bug statistics

Status  
Total Issues: 10

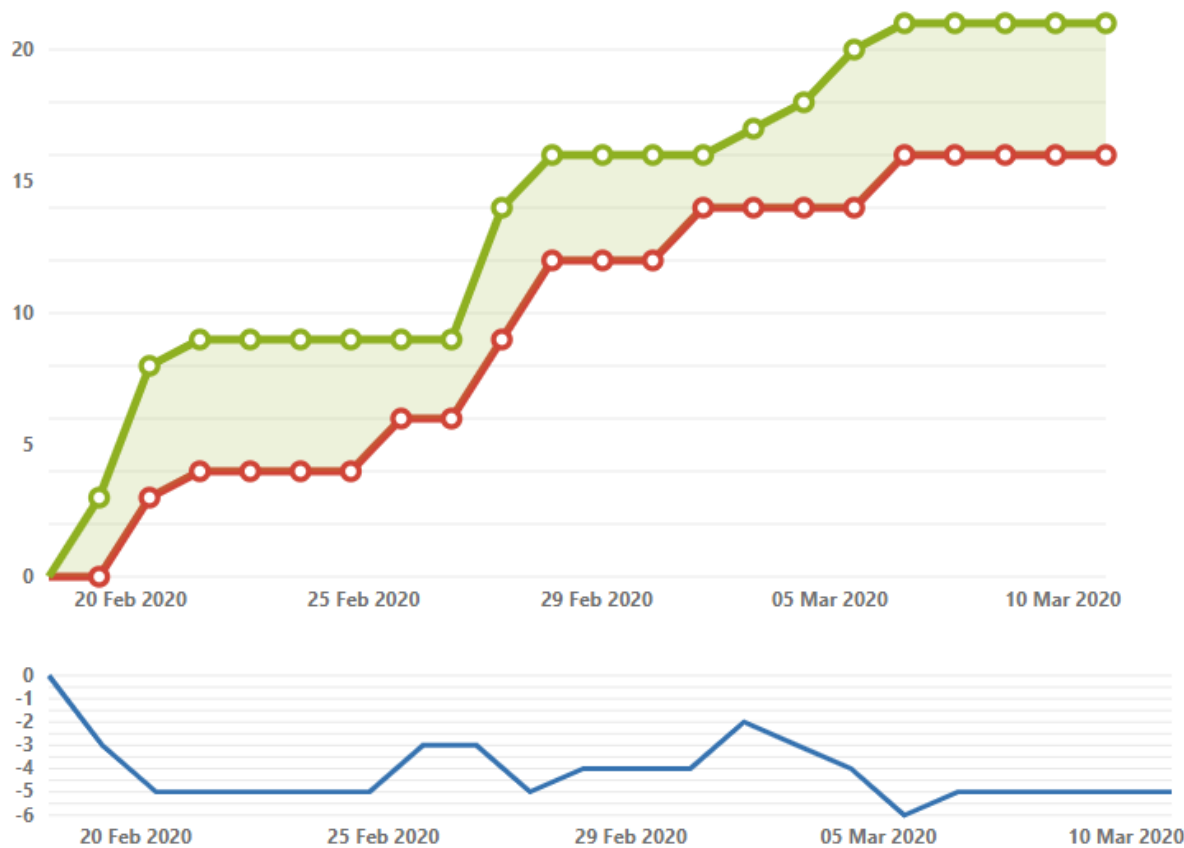

In Review	4
Resolved	3
In Progress	2
Open	1

There are 10 (+2 new this week) not fixed high-priority bugs by now. Here is the list of not fixed high-priority bugs:

Summary	Status	Label	IsRegression
500 on working with media on two devices at the same time	Open	Add_image	
Saved filters: if CodeEnum field value is absent in standard of current object profile then value is displayed in filter editing mode as zero-GUID	In Progress	Saved_filters	Regression
Application crashes after starting inspection after returning via "Go back" browser button from Edit location	In Progress	Edit_location	
List view is not loaded after page refreshing	In Review	List_view	Regression
Panel with coordinates is hidden after tap on Altitude field on <page name>page	In Review	Set_location	Regression
Android tablet. Date/time picker is not available after tapping on Start/End fields on Quick filter page	In Review	Quick_filter	Regression
The version of settings is reset to default if <product1 name> is installed after <product2 name> has already been installed	In Review	Settings	
Deleted saved filters are restored after adding new filter and refreshing page	Resolved	Saved_filters	Regression
Value in TokenLifetime in <config name>.config does not work	Resolved	Seat_counter	
Map padding works incorrectly	Resolved	Set_location	

1.1.1.2. Bugs tendency

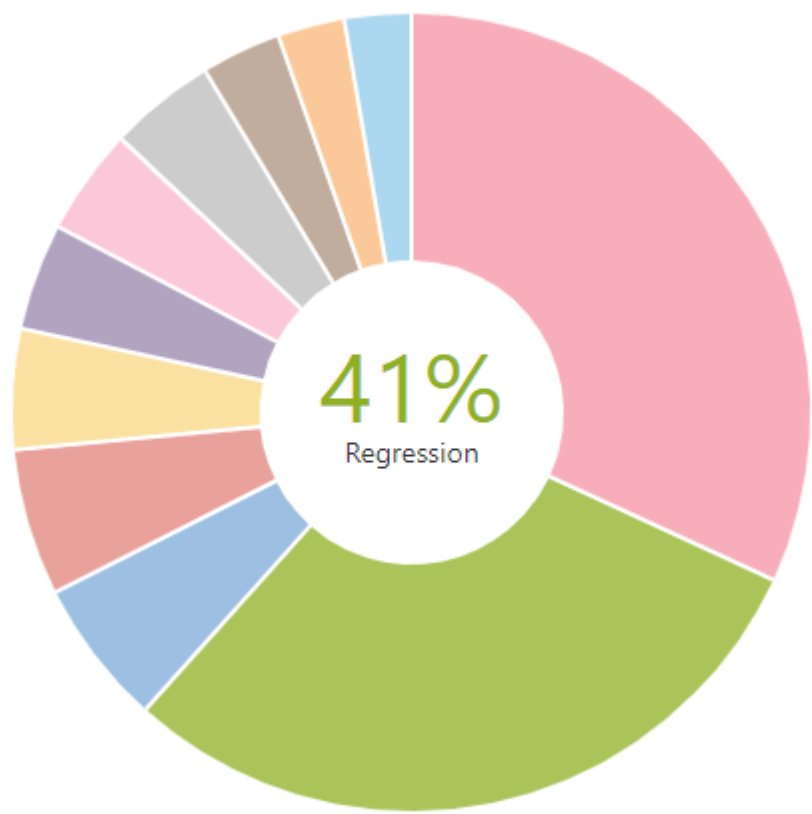

Below is the chart representing bugs open/resolve tendency:

This week **2 new** high-priority bugs were found. Tendency of new bugs becomes more positive as the testing is coming to the finishing phase and bug-fixing has been performed actively during last month.

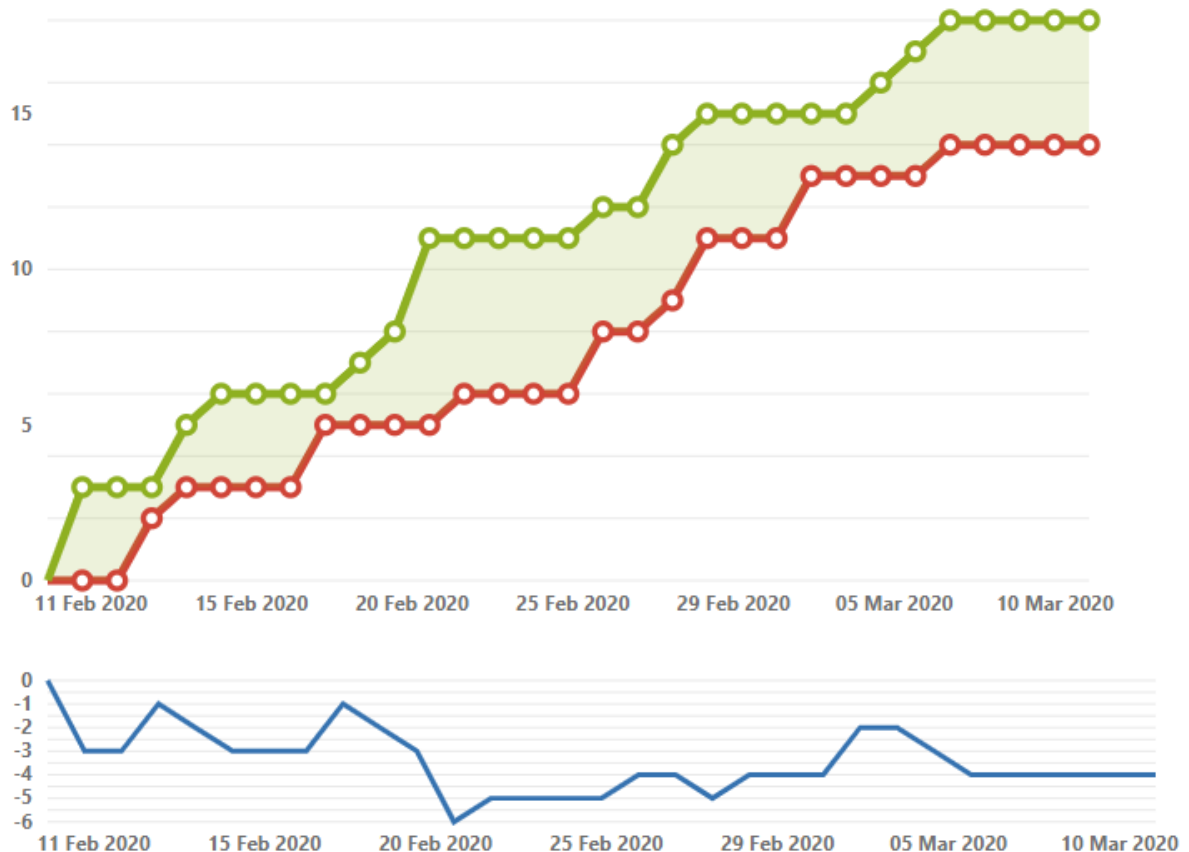

3.2.4 Regression tendency

Below is the chart representing percentage of regression high-priority bugs:

As you can see **41% of all bugs found are result of regression**. To track this, we perform smoke regression testing during each task testing.

Tendency of new regression bugs is displayed on the following diagram:

Issues in the last 30 days (grouped daily) [View in Issue Navigator](#)

○ Created issues (14)

○ Resolved issues (18)

Regression has increased during the previous week: 1 of 2 bugs found was regression one. You may notice that active bug-fixing process is in progress, so amount of not-fixed regression bugs decreases.

## 2. Major Milestone Results

Development team is currently performing 6<sup>th</sup> sprint tasks. It is estimated to be finished in the end of February. Team is also in progress of planning <product name> development. Testing is working on 6<sup>th</sup> sprint tasks. 6<sup>th</sup> sprint testing is estimated to be finished in the middle of March.

## 3. Plans for the next week

Development team is working on 6<sup>th</sup> sprint tasks: small improvements, bug-fixing. Testing team is working on bug-retest and regression testing. (03/10 – 03/17).
